Trust Us With Your Safety : Elevated Protection

Extra Protection

- Double Layer Protection
 - Delivery by Expert Team who have undergone four different training.
- ✓ WHO course completion
 - ✓ Induction, PN, L1 training
 - ✓ SOP & PPE training
 - ✓ EDS L2 decontamination training

Prevent Contamination

- Designated Quarantine & Decontamination Area.
- Rotate team every 45 minutes with new set of PPE.
- Waste Disposal as per regulations.

What is Personal Protective Equipment?

Disposable Respiratory Filters:

Approved Filter Canisters help protect EDS Experts and allow the breathing of clean air - free of chemical vapours & microbes.

Pre-Treatment

- Wearing of approved standard PPEs for protection from the COVID-19 Virus
- Use of Hand Sanitisers at every stage
- Only skilled technical Level 2 EDS experts carry out the treatment
- Separate quarantine area at the treatment site for Donning PPEs

Disposable Hand Gloves:

Double layer - Inner & outer hand gloves, rated specially for protection against viruses and chemicals.

Wellington Safety Shoes & Disposable Shoe Covers:

Slip & Oil resistant, shock absorbent, and anti-static with steel toe-cap for impact & compression resistance & puncture resistance.

Full-face Mask:

The extra protective mask covers the entire face (Mouth, Nose, Eyes). It also protects the respiratory system from any possible exposure to microbes (coronavirus).

Disposable Coverall:

Double-layer disposable coverall with additional tape to cover gaps. Protects against infections & chemicals.

Post-Treatment

- Decontaminate PPEs before the removal
- Disposal of PPEs (biohazard waste)
- as per regulatory compliance. No re-use.
- Post-treatment survey report

ULV Misting Machine:

Ensures the disinfectant is dispersed in micron size particles, reaches & penetrates in all areas including nooks & corners, forming a uniform bonding layer on treated surfaces to act on microbes & viruses.
