QUALITY PEST MANAGEMENT SOLUTIONS FOR THE FOOD HANDLING INDUSTRY

GoldSeal® is our premier cockroach management program that designed with the FSSAI, AIB and HACCP guidelines in mind.

Our patented Exoroach trap uses state-of-the-art technology that is exclusive to PCI. It is virtually invisible, highly durable & has proven to bring the most severe infestation levels down to zero. It is also 100% completely pesticide free & tamper proof. It can be implemented during normal operating hours, works 24x7, & will not in any way hinder your operations or employees.

Consumers have a right to expect that the food they consume will be safe & thus the food industry has become extremely sensitive to consumer criticism. Even a minor infraction can lead to potentially harming the consumer & the reputation of the company.

We at PCI understand the issues faced by Food Handling establishments, be it stringent government regulations (FSSAI) or internal audits & are always looking to provide pest management support in implementing & maintaining the highest of standards.

At PCI, we provide a comprehensive inspection of the establishment to determine the pest-related issues, after which we recommend a program to monitor, control & gradually minimize any pest problems faced by our clients. Through our proprietary Pest Sensitivity Index™ methodology and in consultation with you, we develop a customized program to provide a truly Intelligent Pest Management™ program by using a combination of unique & exclusive technologies.

Pied Piper is our specialised rodent management system using multiple control technologies to effectively control, and prevent future infestations.

Roban® is an attractive rodent poison developed & manufactured in-house as the perfect product for outdoor rodent control. It is also 100% harmless to humans and pets, so there is no risk of accidental poisoning.

Trubble Gum® is a glue-based rodent trap that works perfectly for indoor rodent control that traps and holds the pest rodent in one place.

Rodabox™ is a tamper-proof & lockable unit that is designed to contain Trubble Gum® traps or Roban poisons, to protect from damage & interference.

Our technicians will be on site to assess & determine the root of your problem, providing topical control and stopping the problem at its source. We also employ quick TAT for collection of rodents within the premises.

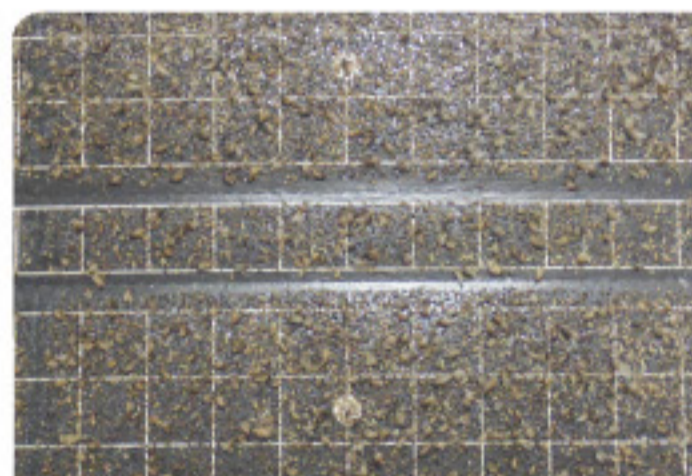

PCI has the most effective solutions to manage all species of flies as part of our Integrated Fly Management (IFM) program for both the internal and external areas of an establishment. We treat the problem at its source and suggest preventive measures to avoid future infestations.

Illume™ flying insect control unit has been designed with a timeless art deco style that will seamlessly fit into almost any interior decor used by restaurants or bars. It offers discreet insect control for restaurant interiors. It is silent in its function of catching a myriad of insects. It is safe and hygienic; there is no chance for fragmentation of insects preventing contamination hazard & no risk of accidental electric shock for users.

Spider® is a glue-board based fly catcher, designed for sensitive areas such as kitchens & other food handling or processing locations. With the patented Translucent Technology™ & the wide attraction zone, the unit catches flies 30% faster than other similar machines. The glue board has a grid that complies with HACCP standards.

Pest-O-Flash is a highly attractive fly zapper and the absolute best in its class with built in safety features and durable materials for an increased life. Stylish yet functional, it comes in formats of two tubes or four tubes - in white & black, designed specifically for outdoor areas.

PCI provides a very specialized service for monitoring insect pests in product, food processing and export industries. Through a strong relationship with Trece Inc, USA, we use specific pheromone lures & traps in strategic locations to determine the source of an infestation. Our technical knowledge, arsenal of products and services allows for better detection, leading to a more effective pest management program catered to your needs. These solutions are implemented as part of the overall food safety programs in accordance with HACCP guidelines.

PCI exclusive product, is a specialized double-ply bag that uses the principal of oxygen starvation to kill all life stages of insect pests (including eggs) that plague grain & other stored products. This tech also increases the usage life of the grain for consumption by preventing germination & mould.

PCI ARSENAL

THE PCI ADVANTAGE

PCI boasts of a team of specialist who have the required expertise & a proven track record in management of pests. With an intensive understanding of the extent of damage pests can cause, PCI has developed in-house, an integrated program to manage pests with following qualities.

- TAILORED SOLUTIONS**
Customised solutions based on the size and operations of the company.
