MOSQUITOES SPREAD DENGUE AND MALARIA

PCI's specialised IMM[®] Service protects you and your family from these diseases.

Protecting Your World[™]

MOSQUITO FACT FILE

Mosquitoes are infamous, dangerous insects that cause significant suffering to their victims. They are considered No.1 pests worldwide and spread Malaria, Dengue, Elephantiasis and many more diseases. Modern medicine is fighting to battle this plague, but this resilient pest is proving to be a tough fight. Prevention, in this regard, is the only cure, and PCI has developed management techniques to help protect you and your family from being victims.

		
10 DAYS	2.7 MILLION	3 TIMES
MOSQUITOES SPEND THEIR FIRST 10 DAYS IN STILL WATER	MALARIA CAUSES 2.7 MILLION DEATHS PER YEAR WORLDWIDE	A MOSQUITO CAN DRINK UP TO 3 TIMES ITS WEIGHT IN BLOOD

Prevention, The Only Cure

DO'S & DONT'S

Change water once weekly in flower vases and drain trays of potted plants.

Do not store water in open containers & cover all water containers with lids.

Prevent outdoor and indoor stagnation in and around your residence & society, especially in unused or broken pots, vessels, old tyres, empty coconut shells.

Scrub & clean edges of containers used for water.

Store old/unused drums & barrels inverted to prevent water accumulation.
